

Whereas the right to strike is the only guarantee to the effectiveness of the collective bargaining process.

And whereas the respect for, and honouring of, picket lines is at the core of the effectiveness of a strike.

We, the undersigned, resolve to support the AUCE strike and to honour the picket lines set up as a part of that strike.

In addition we urge other students to likewise honour that picket.

And in addition we decry the vague and uncooperative attitude of the administration towards those students and faculty members who feel strongly about the sanctity of a legal picket line. We condemn the administration for their delay in supplying an alternative to strike breaking in clear effective terms. And we regard the lack of those terms as an unethical method of intimidation.
