INTERDEPARTMENTAL MEMORANDUM

Please return to

TO Employees: Cat. Products, Serials, Acquisitions, Cat Records

FROM Sheila Porter Cat. Maintenance

Mar. 31 April 1, 1980

19

We, the undersigned, feel a great concern for our health and safety in the Library Processing Centre. Many of us have had concerns about the air conditioning system since moving into this building last April. Many of us have experienced symptoms such as: excessive dryness of mouth, throat, nasal passages, eyes and skin; dizziness; increase in headaches, extreme congestion of the nasal passages, and extreme fatigue. Just to name a few.

As a result of Thursday's (March 27th) gas leak in the cooling system, we feel even more concerned and we ask that an investigation be carried out and that all employees of this building be informed of the results of the investigation.

**Sore, dry eyes + throat +  
headaches.**

Louise Patterson

cat. Products

often very cold; have been experiencing  
constant allergic reactions (dry throat,  
congested sinuses, sneezing) all-year  
round - which my doctor feels is at  
least partially a result of my working  
environment.
