German Consul General,  
Montreal, Que.

Dear Sir:

Yesterday we telegraphed you as follows:  
"We have 15 tons Ferrosilicon for Hamburg to leave here to-day in order to make boat Montreal. Our Agent Rowlands of Sheffield, England, suggests we use British certificate of Origin. Wire collect if this will be satisfactory. Time is the essence of this contract."

You replied as follows: "British Certificate is satisfactory."

As stated above, the T. Rowlands Co. Ltd. of Sheffield, Eng., is acting as our agent in the sale of Ferrosilicon in Great Britain and Europe. These shipments have been accepted by the British Board of Trade and we should now like to have the details of the proper procedure of entry into your country.

We thank you for your prompt and courteous action on yesterday's shipment and hope that this is the beginning of a substantial trade relationship.

Yours very truly,

CHROMIUM MINING & SMELTING CORPN., LTD.,
