Here are the Working Conditions files from previous years. Didn't know when I would be able to drop them off to the office in person, so thought this would be the best solution to getting them back to you.

Was interested in the lighting information. I hope to do some digging around myself later in the year, but won't have time to get too much involved in this sort of thing until at least April. Hopefully during the summer I will be able to persuade someone else, or some others!, to join me on this committee.
