FONDS LEVEL DESCRIPTION

Harley Hatfield Cascade Wilderness fonds [textual records and other material]. – 1804 – 1997, predominant 1970 – 1990. – 1.48 linear m of textual records and other material.

Biographical Sketch:

Harley Robert Hatfield was born on February 28, 1905 in Saint John, New Brunswick. The son of Arthur Seaman Hatfield and Roberta (Christie), he moved to British Columbia with his family in the summer of 1907. The family first settled on the edge of Shuswap Lake, but moved quickly to Summerland that fall. In 1909, the Hatfield family relocated to Kaleden, one of the earliest families to settle in that community. Some time between 1910-1920, the family moved once again to Penticton. After his graduation from Penticton High School in 1923, Harley Hatfield moved to Vancouver to begin studies at the University of British Columbia in 1924. Following his marriage to Edith White Tisdall, known as 'Toddy', in 1932, the couple moved their family to Vaseaux Lake. Two sons were born to them, John, in 1934, and Peter, in 1936. (Two other children, Chris and Alyson, were born a decade later, following World War II.) The Hatfield family re-located to Penticton in the late 1930's, where they remained until Edith's death in 1984. Harley Hatfield stayed on at the family home until 1994, moved to a retirement home in Penticton between 1994 and 1998, and finally moved to Vancouver in 1998, where he lived until his death, on February 14, 2000.

While studying at UBC, Hatfield began a career in construction to help pay for his studies. In the late 1920's, he graduated from UBC with a Bachelor of Arts in History, and, returning home to Penticton, he and his father established the family business, Interior Contracting Company Ltd., in 1930. The Company built many roads, bridges, and dams throughout the British Columbia interior. Hatfield enlisted in the military at or near the beginning of World War II and first served with the Royal Canadian Air Force. He later transferred to the Royal Canadian Engineers, attaining the rank of Captain. He never had the opportunity to serve overseas during wartime. In 1945, his unit was demobilized and he returned to his family and to Interior Contracting in Penticton. The family business was sold in the mid-late 1950's.

It was in the 1950's that Hatfield became one of the founding members of the Okanagan Similkameen Parks Society (OSPS). He was also a director, writer, and, eventually, Honorary Life Member of the Okanagan Historical Society, and an active member of the Wilderness Advisory Committee. His son, Peter, would eventually take up his father's interest in the OSPS and the Wilderness Advisory Committee and in his efforts to protect the Cascade Wilderness area. Harley Hatfield's efforts to restore both the Hudson's Bay Company and Okanagan Brigade Trails were rewarded with the naming of Mount Hatfield, located near the Hudson's Bay Company Trail, in his honour in the late 1960's, and with a Heritage Canada Foundation Award in 1981.

Although his work to preserve the Cascade Wilderness and related trails claimed the bulk of his attention, Harley Hatfield also served as a director of the Engineering Institute of Canada from 1961 to 1971, as an Alderman for the City of Penticton between 1965 and 1968, as an Executive Member of the Similkameen Regional District from 1965 to 1969, as a member of the Penticton Board of Trade, and in various capacities with the Boy Scouts.

Scope and Contents:

The fonds consists predominantly of textual, graphic, and cartographic materials documenting the efforts of Harley Hatfield, in conjunction with the Okanagan Similkameen Parks Society, the Wilderness Advisory Committee, and the Okanagan Historical Society, to establish the Cascade Wilderness area and the Hudson's Bay Company and Okanagan Brigade Trails as protected areas in the interior of British Columbia. The fonds also includes textual records illustrating Mr. Hatfield's research into the old fur trading routes in the area, and the prominent persons connected with breaking those trails; additional materials document facets of Mr. Hatfield's personal life and other interests.

Notes:

Title based on contents of the fonds and on direction of the institution.

Title does not accurately reflect the contents of the records. Approximately 50% of the material was generated by Peter Hatfield, Harley Hatfield's son.

The majority of the material dated prior to 1960 is research material accumulated by Harley Hatfield from archives and other sources. Two boxes containing this material (#7 and #9) have not been arranged or described.

Includes 152 maps, 148 photographs (some contained within a photo album), 395 slides, 1 film, 1 audio cassette tape, and 1 VHS video tape.

Transferred from Peter Hatfield, February 20, 2001.

In large part, the original order of the creator has been lost. In many cases, materials pertaining to specific series are distributed throughout the fonds. For example, materials from different series may be found within the same folder.

Box list available.

SERIES DESCRIPTIONS

1. Okanagan Similkameen Parks Society Records. – [19-? – 19-?]. – [?] m of textual records.

Scope and Contents:

Little can be determined about the history of the Okanagan Similkameen Parks Society, other than the fact that Harold King was President of the Society in 1982 and 1983.

The series consists of correspondence, published material, and minutes relating to the Society's involvement in the Cascade Wilderness project. The series has been divided into the following sub-series:

- 1) correspondence
- 2) newsletters / brochures / booklets
- 3) reports and surveys
- 4) minutes

Notes:

Little is known at this point about the nature of Harley and Peter Hatfield's involvement with the Okanagan Similkameen Parks Society, other than that Harley may have been a founding member. It is also unclear in the records to what extent the Society was involved in the Cascade Wilderness project, and whether the Society was established solely as part of the effort to get the Cascade Wilderness area set aside, or was established separately and was also involved with other activities. From the records, it appears that the Society was involved with many different activities.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

2. Committees Records. – [ca. 1970 – 1992]. – [?] m of textual records.

Scope and Contents:

The series consists of correspondence, minutes, newsletters and other textual material relating to several committees that were involved in the Cascade Wilderness project, including: the Cascade Advisory Committee, the Wilderness Advisory Committee, the Cascade Wilderness Advisory Committee, the Cascade Wilderness Committee, the Okanagan Historical Society, and others. The Cascade Advisory Committee was established by the B. C. Ministry of Forests in 1983 to advise the Ministry in ongoing discussions regarding the Cascade Wilderness Area. It was comprised of representatives from several organizations with an interest in forestry issues. The records contain little information regarding the administrative histories of the other committees. The series has been divided into the following sub-series:

- 1) correspondence
- 2) newsletters/ booklets/ brochures
- 3) reports and surveys
- 4) minutes

Notes:

It is very difficult to determine from the records what the relationships were between these committees, or their respective roles in the Cascade Wilderness project. The names of the Wilderness Advisory Committee, the Cascade Wilderness Advisory Committee, and the Cascade Wilderness Committee seem to have been used interchangeably, and it is possible that they are all the same organization. There is no explicit evidence within the records to indicate one way or the other. It is also unclear whether these committees were subsidiary bodies to the Okanagan Similkameen Parks Society or were independent entities.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

3. Cascade Wilderness Area Trails Records. – 1972 – 1993. – [?] m textual records and other materials.

Scope and Contents:

Contains correspondence, newsletters, slides, photographs, clippings, and other materials documenting the efforts of Harley and Peter Hatfield in protecting and maintaining historic trails within the Cascade Wilderness area. Sub-series include:

- 1) Hudson's Bay Company Brigade Trail
- 2) Okanagan Brigade Trail
- 3) Blackeyes Trail
- 4) Whatcom Trail
- 5) Hope Trail
- 6) Dewdney Trail
- 7) Other Trails

Limited information on other trails in the area is also included.

The series forms part of the Harley Hatfield Cascade Wilderness fonds.

4. Government-related Records. – [ca. 1970 – 19-?]. – [?] m of textual records.

Scope and Contents:

The series consists of correspondence between various government agencies and officials at the federal and provincial levels, and various individuals, including Harley and Peter Hatfield, and copies of reports and surveys issued by various government agencies.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

5. Presentations. – [198-? – 198-?]. – [?] m of textual records and graphic materials.

Scope and Contents:

The series consists of textual material and slides used to make presentations to various groups, including the B.C. Ministry of Forests and the Cabinet Committee on Economic Development, about the proposed Cascade Wilderness area.

It is difficult to identify from the material which person or group was making each presentation. It is equally difficult to distinguish which slides may have been used with which presentations; it is possible that some groups of slides may have been used in more than one presentation.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

6. Maps. – 1939 – 1997. – 152 maps.

Scope and Contents:

Contains a variety of original and photocopied maps of British Columbia and Northern Washington State. The majority illustrate details pertaining to the Cascade Wilderness area in general. Others plot the course of individual trails within the area.

Notes:

The maps have been removed from the main body of records and are contained within 17 map folders. Further description of the maps series is being undertaken separately. Please see the Maps Index at U.B.C. Special Collections for further information.

Older maps and some maps, previously repaired with adhesive tape, are now brittle and breaking.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

7. Personal/Miscellaneous Records. – [19-? – 19-?]. – [?] m of textual records and other materials.

Scope and Contents:

Contains a limited amount of material documenting Harley Hatfield's other interests and personal life outside his involvement in the Cascade Wilderness project. Included among these is information about his involvement with the Boy Scouts and the Veterans Against Nuclear Arms, as well as copies of his own poetry. The series has been divided into:

- 1) correspondence
- 2) newsletters/brochures/booklets
- 3) newspaper and magazine clippings/magazines
- 4) slides and photographs
- 5) other

Notes:

It is likely that there are other records, outside this fonds, relating to Mr. Hatfield's other activities and personal life that have not been included within this accrual. There are only a few items of this nature present within the fonds and it is evident that Mr. Hatfield was involved in a great number of diverse activities.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

8. Research Material. – [1804 – 19-?]. – [?] m of textual records and publications.

Scope and Contents:

Series consists of textual material gathered by Harley Hatfield in the course of his research into the history of the Okanagan and surrounding area during the 19th and early 20th centuries. It includes primarily photocopies and transcripts of records from various archival institutions relating to the fur trade and other activities, the ownership of land, and biographical information on prominent individuals in the Okanagan during the time period. The series has been divided into the following sub-series:

- 1) books
- 2) photocopied materials
- 3) transcribed material
- 4) other

Notes:

While many of the photocopied items bear the date of creation for the original item, they generally do not indicate the date when the photocopy was made or used. The inclusive dates for this series represent the dates indicated on original materials, not photocopies. The oldest original was dated 1804, and there are a few other originals that also date to the 1800's.

This series forms part of the Harley Hatfield Cascade Wilderness fonds.

Harley Hatfield Cascade Wilderness Fonds

**An Inventory of the Cartographic Materials
Rare Books and Special Collections
University of British Columbia Library**

Tom Anderson
February 2003

Harley Hatfield Cascade Wilderness Fonds. – 1863-1986, (1972-1983 predominant). -- 152 maps : various scales; various sizes.

Harley Robert Hatfield was born on February 28, 1905 in Saint John, New Brunswick. He moved to British Columbia with his family in 1907, and spent most of his life in Penticton. In the 1950's he became one of the founding members of the Okanagan Similkameen Parks Society. He was also a director, writer, and eventually, Honourary Life Member of the Okanagan Historical Society, and an active member of the Wilderness Advisory Committee.

The fonds consists of cartographic materials related to the efforts of Harley Hatfield and the Okanagan Similkameen Parks Society to trace, document and restore the Hudson's Bay, Okanagan Brigade and a number of other Trails in the Cascade Wilderness area in south-west British Columbia. These trails have been incorporated into digitized Forest Cover Map Series (92H) produced by the Ministry of Forests. Many of the maps deal with the proposed extension to Manning Park, and are hand annotated. There are a large number of photocopies of published maps of the Hope-Princeton area. Harley Hatfield's son, Peter Hatfield, created a number of later maps. Fonds also includes lithographed posters of nine animals found in British Columbia and a small number of textual records related to the Harley Hatfield's efforts.

Inventory available.
