January 7/86

TO: TED BYRNE

FROM: SARAH ECKHOOT, CHEMISTRY

Enclosed please find the petition from the Chemistry Dept. The one I took to Physics was "lost". There is very little support there from the Faculty and seemingly from members themselves. They were curious though about the response from other Departments and I said I would try to find out from you. I'm sorry I have been so late in returning this but I was on vacation.

Also, may I make a suggestion about the scheduled membership meetings. I realize that the notices are being held-up in the backlog of mail but unfortunately it limited the number of people from this Department, myself included, that attended. I understand that phoning the stewards well in advance would be time consuming, but I think a larger turn-out at the meetings would be worth the effort. I feel a show of solidarity at this time is crucial.

I am looking forward to the next stewards' meeting. If you are unable to contact me at my office, please feel free to call me at home. My number is [REDACTED].

Yours sincerely,

Sarah Eckhout.
