Introduction

Lille d'Easum (1899-1980) was B.C. Voice of Women executive member, Executive secretary of the B.C. branch, Canadian Coalition for Nuclear Responsibility, freelance writer and an anti-nuclear activist.

Lille d'Easum's involvement during the 1960s and especially the 1970s in the anti-nuclear movement, particularly her work as Executive-secretary for the B.C. branch of the Canadian Coalition for Nuclear Responsibility (CCNR), is the focus of the collection. There is extensive information (Magazine articles, fact sheets, corporate and government publications and newspaper clippings) on nuclear power plants, uranium mining, the hazards of the nuclear industry, and nuclear terrorism. Disarmament and the international peace movement, particularly in Japan, are also significant topics. There are several folders of CCNR correspondence, especially with other anti-nuclear and environmental organizations.

The collection contains numerous articles written by Lille d'Easum on various nuclear energy issues, and a variety of her other writings, such as her prize-winning short story, "Return to P'yong-yang", and the article on the Amchitka Nuclear Test.

Also in the collection is extensive information on the energy crisis, alternative energy sources, alternative technology and lifestyles, environmental concerns, international politics - particularly imperialism in "Third World" countries - and information on individuals in the anti-nuclear and environmental movements, such as Helen Caldicott and Amory Lovins.

There is a large variety of periodicals, primarily dealing with environmental concerns and also anti-nuclear groups' newsletters. The collection, as a whole, is quite varied, brought together by the major CCNR concerns. There is also some B.C. Voice of Women material interspersed with the CCNR information.

The collections cover the years 1969-1980, with major activity in the middle 1970's. The materials are arranged by correspondence, ephemera, printed matter and subject files.
