FONDS DESCRIPTION

MacMillan Bloedel, Limited, Canadian White Pine Division

MacMillan Bloedel, Limited, Canadian White Pine Division fonds.

1920-1998, predominant 1941-1989.

10.8 m textual records and other material.

Administrative History:

The Canadian White Pine Division of MacMillan Bloedel, Limited, located on the Fraser River in Vancouver, British Columbia, is one of the oldest mills on the West Coast and was the first sawmill owned and operated by the H.R. MacMillan Export Co., the predecessor company to MacMillan Bloedel, Limited. The portion of the mill known as "B" Mill was originally built in 1923 as Dominion Mills; the H.R. MacMillan Export Company purchased it in 1935. Like other large sawmills on the West Coast, the mill first produced Douglas Fir lumber in lengths up to 40 feet. This lumber was intended mainly for structural purposes, such as framing. In time the mill expanded its range of lumber production to include Western White Pine, Hemfir, Spruce, and Western Red Cedar. The sawmill's booming grounds were located on the Fraser River. In 1944 "C" Mill was built; it was integrated with "B" Mill in 1959 to establish a "one mill concept," with "B" Mill processing larger diameter logs and "C" Mill processing smaller diameter logs. In addition to the "B" and "C" mills, the present sawmill includes a planer mill and necessary support services. Today the plant produces only Western Red Cedar, both rough and finished, for domestic and foreign markets. The Canadian White Pine mill became part of Weyerhaeuser operations as part of that company's merger with MacMillan Bloedel, Limited in 1999.

Scope and Content:

The fonds consists of records of the Personnel, Safety, and Physical Plant and Maintenance departments of the Canadian White Pine Division of MacMillan Bloedel, Limited, as well as some records of the Division's Manager and other MacMillan Bloedel, Limited divisions. Includes administrative, personnel, project, and subject files containing correspondence, memoranda, reports, statistics, financial records, statements, organizational charts, brochures, newsletters, and other records. The fonds also includes many plans, photographs and slides, and some artifacts. Fonds has been arranged into the following series: Personnel Department records (1923-1997, predominant 1941-1989); Records of the Manager (1938-1946, 1968-1974); Safety Department records (1938-1978, predominant 1952-1976); Physical Plant and Maintenance Department records (1920-1998, predominant 1946-1982); and General Photographs (1940-1981).

Source of supplied title: Title based on contents of the fonds.

Physical description note: Includes 522 photographs, 274 negatives, 124 slides, 15 photocopied photographs, 861 plans, 16 artifacts, and 9 certificates.

Immediate source of acquisition: The records were acquired from Weyerhaeuser Company, Limited in 2002.

Arrangement: The fonds has been arranged into series according to department. When possible, the original arrangement of the records has been maintained.

Restrictions: Restrictions apply to some individual files.

Finding aids: File list is available.

Related records: Related records at this institution are located in the MacMillan Bloedel Ltd. fonds and the H.R. MacMillan fonds.

Accruals: Further accruals may be expected.
