Dr. R. Hill Head Department of Paediatrics Children's Hospital 4480 Oak Street Vancouver, B.C.

Dear Dr. Hill:

AUCE Local 1 on behalf of employees working in the Department of Paediatrics in the new Children's Hospital request that the Gestafax and Gestetner machine be removed from Room 2D-1, second floor, Children's Hospital and be placed in another location.

We are especially concerned about the Gestafax ozone emissions. As little as 0.1 ppm (parts of vapour per million parts of air) can cause lung damage; ear, nose and throat irritation. Further, operation of these machines increases the already high noise level in the room.

We would appreciate your immediate attention to the matter and await your reply.

Thank you.

Sincerely

alucia

Pairicia House Secretary-Treasurer AUCE Local 1
