Re: Investigation Report - Library Processing Centre

Please be advised that the University is undertaking an investigation on the air conditioning system at the Library Processing Centre.

This investigation arises from the evacuation of the Library Processing Centre on March 27, 1980.

Representatives from the equipment manufacturer and the Workers' Compensation Board's Hygiene Office are involved with the investigation.

A report on the investigation will be tabled at the April 22, 1980 Safety Committee meeting.

C. E. Barber
