

ALL OUT STRIKE - INFORMATION QUESTIONNAIRE

An all out strike is when all AUCE members are off work and the whole campus is being picketed. It affects the operation of the whole campus and because of this is considered by some people to be our strongest method of applying pressure on the university. It is, however, the costliest, because we all lose our wages and therefore is our last course of action.

INSTRUCTIONS:

The shift times have been worked out to provide 15 minute overlaps, so that information can be passed on from group to group. The last three shifts are shortened since they are felt to be the least desirable. The last and first shift overlap by 45 minutes to accommodate the heavy traffic expected during the early morning. Shift captains will be assigned and they will be responsible for making the initial contact with individuals to inform them of their shift time and gate. It may be possible if there are enough people within your picket group to arrange some form of rotation, i.e., the odd night off. When these forms are correlated various people will be asked to fill other positions, such as sub-coordinator and coordinators.

Please indicate your first, second and third choice of shifts. Every effort will be made to accommodate your choice. Please PRINT or TYPE.
