Dear Samia:

The last time I wrote to you was April 21, 1982. At that time we sent you an additional 5 questionnaires.

I would appreciate some information from you as to what the status of our "Health Hazard Analysis of A.U.C.E. - VDT and CRT Operators" is.

Originally, according to your letter of October 16, 1981, the Walkthrough was to be done between January and February of this year; the Comprehensive report was to be done between December 1981 and the beginning of March 1982 and the Concluding seminar was to be done by March 1982.

In addition we were presented with and accepted an itemized budget on the basis of the being done at the suggested times. We have paid some money to study but not all, we expect some opinion from you as to what amount is outstanding. Understandably we don't feel very happy with the lack of results against the amount still outstanding to you.

Yours truly,

Carole Cameron
