Introduction

Correspondence files of the British Columbia Electric Railway Company, Limited, created mainly prior to 1928, were deposited by the British Columbia Hydro and Power Authority from their Fir Street records room in November, 1964. In addition, minute books and accounting records of the B.C.E.R. and related companies were transferred. In May, 1969, the minute books of British Columbia Power Corporation Limited, 1928-63, the parent company of British Columbia Electric Company Limited, were donated after the liquidator of B.C. Power Montreal Trust Company, made a final distribution among the shareholders of B.C. Power Corporation Ltd.

Correspondence files were transferred from the transfer cases (containers) in which they arrived to cubic ft. records storage boxes maintaining the original filing system as stated on various schedules. Oversize material such as letter books, minute books, accounting books, wage agreements, seals, etc. that were too large for the cubic ft. records storage boxes were placed together on the shelves. It has been listed on pp. 94-98 of the inventory. When requesting material, please ask for the box number or, if the material is oversize please state shelf number with specific information about the desired item or items. Since the acquisition of the B.C.E.R. records, considerable progress has been made in listing maps and plans that were located in the correspondence files. A finding aid to the maps can be found in a separate inventory entitled, B.C.E.R. inventory, maps and plans.

BC Electric Railway Company Authority record

Identity area

Type of entity: Corporate body

Authorized form of name: BC Electric Railway Company

Description area

Dates of existence: 1897-1961

History:

British Columbia Electric Railway was a railway and streetcar company operating from 1897 to 1961. A London-based company chaired by Robert M. Horne-Payne and R. Henry Sperling overtook the bankrupt Consolidated Railway Company on April 3, 1897, incorporating it as the British Columbia Electric Railway company. By 1903 B.C. Electric began building its own streetcars, inter-urbans, locomotives, work equipment and freight cars in a shop in New Westminster. Over the following years BC Electric provided increasingly expanding rail and bus transit for passengers and freight across Southern British Columbia. As World War Two came to an end, B.C. Electric implemented a 'Rails to Rubber' programme, replacing electric railway streetcars with Presidents' Conference Committee (PCC) Streetcars. In 1961 the provincial government took over BC Electric with the railway becoming a division of Crown Corporation BC Hydro.

Name of creator: BC Electric Railway

Custodial history: The British Columbia Hydro and Power Authority donated the fonds in November 1964. In May 1969 the minute books of British Columbia Power Corporation Limited, 1928-1963, the parent company of British Columbia Electric Company Limited, were donated. An inventory for correspondence, maps, newspaper clippings, and accounts payable vouchers was created by RBSC staff at this time (see attached PDF). In 2018 an accession of 5 unprocessed boxes was added to the fonds as an accrual, and arranged and described at that time.

Scope and content: The accession comprises the operational records of BC Electric Railway Company, predominantly from 1935 to 1961. The records reflect the company's main activities, including the creation of reports, presentation of evidence at Public Utility Commission Hearings, minutes of meetings, correspondence, agreements, and applications for changes in rates of service. Records are arranged in one series of Operational Records.

The Operational records series features minutes of Public Utilities Commission hearings and transportation fare hearings, evidence presented at hearings, reports, applications for changes in rates and tariffs, agreements, schedules of electrical energy rates and conditions, minutes of rates sub-committee meetings, correspondence, and records related to British Columbia Telephone Company service rates and tariffs.

Notes Area

Physical condition: Records are in generally good condition.

Arrangement: Rare Books and Special Collections acquired the fonds in 1969. About 120 metres of records were donated. The fonds was arranged and described by RBSC at this time. Five unprocessed boxes of textual material remained in the backlog until 2017. In December 2017, an archivist from Rare Books and Special Collections undertook the arrangement and description of the fonds. The archivist provided an intellectual order for the accession to increase ease of use by researchers. Where present, the original order of the records has been maintained.

Accruals: No further accruals are expected.

Name of creator: British Columbia Electric Railway Company

Administrative history: British Columbia Electric Railway was a railway and streetcar company operating from 1897 to 1961. A London-based company chaired by Robert M. Horne-Payne and R. Henry Sperling overtook the bankrupt Consolidated Railway Company on April 3, 1897, incorporating it as the British Columbia Electric Railway company. By 1903 B.C. Electric began building its own streetcars, inter-urbans, locomotives, work equipment and freight cars in a shop in New Westminster. Over the following years BC Electric provided increasingly expanding rail and bus transit for passengers and freight across Southern British Columbia. As World War Two came to an end, B.C. Electric implemented a 'Rails to Rubber' programme, replacing electric railway streetcars with Presidents' Conference Committee (PCC) Streetcars. In 1961 the provincial government took over BC Electric with the railway becoming a division of Crown corporation BC Hydro.

Scope and content: The accrual to the fonds consists of one folder containing an exhibit to the submission for the Royal Commission on rate structure and revisions.

MAPS - MS COLL. - BCER

[British Columbia: a collection of maps, diagrams, engineering and architectural plans accompanying the papers of the British Columbia Electric Railway Company, including its related companies.] / British Columbia Electric Railway Company. -- [Vancouver: British Columbia Electric Railway Company, 1861 -1961].

650 maps; various formats; various scales; 141 x 102 cm. and smaller.

The records of the British Columbia Electric Railway Company were transferred to the University of British Columbia Library (in lieu of the Provincial Archives) in 1964 when the Provincial Government "nationalized" the B.C.E.R. and the B.C. Power Commission to form the British Columbia Hydro and Power Authority. The Records were accompanied by a file list, and have been maintained in the order in which they were received. As the arrangement is not obvious, an index has been made for the inventory of maps.

This collection was processed in 1978 and 1979 by students in the Librarianship 614 class. Wendie McHenry compiled the inventory for maps in Boxes 1, 8, 179, 180, 184, and 185; Mary Sakellaridis did Boxes 2, 3, 4, 6, 7, 12, 13, 17, 18, 19, 20, and 21; Nancy Stilwell did Boxes 21 to 36; and Allan McFarlane did Boxes 37 - 42, 54, 57 -59, 71 - 74, 78, 83- 87, 91 - 93, 101, 103, 105, 121, 135, 138, 140, 143, 158, 163, 165, 167, and 168.

Revised by Christopher Beall, Winter 1997 - 98.
