

This is my Safety report for April 24, 1984

There was a meeting of the Pres. Safety C'tee this morning

There is nothing earth shattering to report on that matter.

Susan pointed out that there is asbestos removal going on in IRC.

Mr. Crampton said
Karen told the exec. that the WCB seminar in May is for those who have safety responsibilities written into their job descriptions -- management positions. Mr. Crampton told Karen that she did not qualify for the seminar for the above reason -- and that sitting on a committee did not qualify her either.

Sheri asked about the door for Special Collections. Karen answered that Emerald Murphy asked Capt. Affleck about this at the meeting this morning (After the mtg). His reply was that provisions were being made ~~to~~ for the installation of the door.

Sheri asked Karen what she had found out about the 7th floor being used to ~~store~~ house stacks. Karen replied that she had not investigated the matter. ~~She~~ (She forgot about it) When she asked if the executive would instruct her to write Erik de Bruijn ~~about~~ regarding the stacks in the 7th floor, Sheri asked that Karen check with her this week ~~for~~ for more details. ~~Perhaps~~ Perhaps the letter was unnecessary.

KRS.
